OLX QA Automation

We're looking for a skilled, curious and passionate OLX QA Automation who wants to make a difference.

Lisbon, Portugal

Engineering

Online since Dec 6, 2017

OLX Group is part of Naspers, a global internet and entertainment group. In Portugal, we have our Lisbon Tech Hub creating classified products for the globe: many countries in Europe, Asia, Latam, etc.

In Portugal, OLX is the second Portuguese website with the most visits, every day! Our team is also responsible for other major Internet Portals in Portugal, nº 1 in each sector, Standvirtual and Imovirtual.

Due to our international growth, we are looking for a **QA Automation** based out of Lisbon to support Development team.

...at OLX

- At OLX we have a clear ambition – to empower millions of people across the globe by helping them connect and share their goods and services. This inspiring purpose has helped us build one of the world's leading Internet companies. This combination of business and purpose attracts a certain type of person. If you've got an entrepreneurial drive and think you can use that drive to contribute to our purpose, then we'd love to empower you to be successful. Want to know more?

Why OLX?

- The OLX Group is a network of leading classifieds platforms in 45 markets, including brands like OLX, Avito, letgo, dubizzle, among others.
- The OLX Group connects local people to buy, sell or exchange used goods and services by making it fast and easy for anyone to post a listing through their mobile phone or on the web. Hundreds of millions of people in local markets around the world generate more than 1.9 billion monthly visits, 37 billion monthly page views and 54 million listings every month on the OLX Group's online marketplaces.
- Our 3000+ committed employees are making a difference from our 25 offices across the globe

What responsibilities will you get when working with us?

Working closely with the product and development team to define the best approach for creating tests.

- Creation of automated test scripts based on functional requirements, using black and white box techniques
- Report and monitoring the defects life cycle, using defect management tool: JIRA
- Automated Test software on PC, Mac and Mobile devices (Android and iOS)
- Automated Functional Tests Execution (System and/or End To End Testing)
- Generate and analyse test reports and communicate results to the team
- Working with Automated Test Framework, preferencial using Webdriver and Cucumber (Preferencial with experience in this tools)
- Collaborate and align with test engineers from our teams around the world

What will you need to be successful in this role?

- Bachelor's Degree in Computer Science, Engineering or related field
- Very good hands on knowledge and skills in the automated testing frameworks
- Know-How with Continuous Integration and Continuous Delivery
- Experience with Unit / UI Testing
- Experience with Jenkins
- Expertise in object oriented programming languages and coding skills
- Knowledge of agile development practices (XP, Kanban, Scrum)
- Be able to communicate in English (oral and written)
- Experience with test automation for native apps (Android and/or iOS)
- Experience with Espresso, Robotium, Appium , UI Automator and Android testing Support library is a plus
- Attention to detail
- Proactive and Persistence
- Think Outside The Box

What can you expect from us and what do we offer?

- Unique opportunity to become a part of an international team, learning from one another and contributing to the Global OLX Group success, based in Lisbon
- Great place to learn and develop within fast growing, global classifieds leader which opens further career opportunities in diverse world of OLX and Naspers
- Fun and informal environment where getting stuff done and enjoying the ride is far more important than rules and hierarchies
- Perks like company self-service, food supply, bonus system for good performance, and others
